HR kiosks – Your Virtual Assistants

Employee self-service and communication (ESS&C) is one of the leading trends to relieve HR departments of its administrative burdens so that HR professionals can take on a more substantive role in the organization.

LAT's Human Resource Kiosks product line can do just that. With a variety of interface options, communications, features and capabilities, you can transform your mundane to exciting quickly and efficiently.

Take a look at the sampling of applications that you can automate:

- *Benefits lookup*
- *Payroll changes*
- *Latest Company News / Events*
- *Training*
- *Safety Information*
- *Directions*
- *Literature Distribution*
- *Employee Directory*
- *Survey / Feedback*
- *Employment Applications*
- *..much more*

The LAT's Kiosks allow you to quickly bring these and other

services to your employees, while still retaining full control and authority.

Here are some unique features of our kiosk line:

- *Variety of styles to fit any space or décor constraints*
- *Embedded CPU with hardened electronics for abuse and long life*
- *Wide-screen monitor with privacy guard*
- *RFID capabilities*
- *Biometrics authentication*
- *Printer / Headset / Scanner options*
- *Remote Control Software*
- *Over 200+ customizations*
- *Multi-lingual (8 languages included)*
- *..much more*

LAT's technology is used by millions of people throughout the country in public libraries and universities.
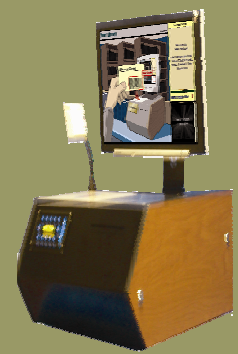

Simple, interactive, intuitive user screens
